

# Lanyard Inspection

## How to inspect before use

Ensure your safety, the safety of your site and teammates when conducting inspections. All inspections of Lanyards shall be conducted in accordance with the relevant standards.

### Inspect all the components of the Lanyard thoroughly

#### 1. Manufacturer Tag/Label & Shock Absorber

#### 2. Webbing/Rope & Load Bearing Stitching

#### 3. Hardware, Connectors, Buckles & Adjuster

#### 4. Attachment Points

## what to look for

Burnt, Chemical Damage, Colour Change, Corroded, Cracked, Cut, Damaged Stitching, Distorted, Excess Dirt/Grease, Gouged, Hardened Fibres, Heat Damage, Holes, Incorrect Colour Tag, Information Missing, Nicks, Unexplained Lumps, Unreadable, Worn

**NOTE:** Pay particular attention to the shock absorber for signs of deployment

If any doubt is raised regarding the Lanyard NOT being fit for service, tag accordingly and contact us on 3801 6565.
